- ❖ This report provides information about the lengths of stay experienced by AOD clients during treatment, including a specific breakout for clients receiving NTP services/modalities.
- ❖ The data were collected during client discharges from AOD treatment that occurred during the selected reporting period and is based on service counts ("N") and not unique clients. This may result in multiple counts for the same client if they had more than one treatment discharge during the selected reporting period.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).
- ❖ Note: The "Fiscal Year" filter selection is not used by this report despite being listed above.

**\*\*\*Important\*\*\***

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

**Notes:**

(1) - Client counts under NTP Maintenance overlap with the Outpatient and Residential sub groups.
